

PRESS RELEASE: PARIS April 12th, 2010: BMSystems is selected by French life science clusters to present its disruptive science & business model during BiO in Chicago.

- *Collaborative Research & Business excellence:* Bio-Modeling Systems is selected by [Medicen](#), the Paris region leading life sciences cluster, and the other National clusters to represent collaborative R&D excellence at the Fast Track "R&D Partnering with France" during BiO Chicago, May 3rd, 2010. Bio-Modeling Systems' presentation ("*New collaborative R&D paradigm deciphered and its first operational successes in CNS, biodefense/biosecurity and Green Industrial Biotech*") will focus on the operational benefits generated by its disruptive science & business model. Do not hesitate to meet us at this event. Program and free registration: <http://www.fasttrackbio.com/2010>
- *New collaborative R&D player in the field of antibody improvement.* Pherecydes-Pharma (www.pherecydes-pharma.com), our fully operational industrial spin-off, will announce during BiO Chicago the signature of a major collaborative R&D agreement with a European partner in antibody improvement based on its proprietary TAPE technology, a patented BMSystems' discovery transferred to Pherecydes-Pharma.
- *Business opportunities:* BMSystems, member of BiO, will participate to [BiO 2010 partnering forum](#) in Chicago. Do not hesitate to meet us during the partnering forum or at the French Booth 3712 for business updates and possible collaborations.

For sustainable business, time to market is a critical issue. Why wait for the failure of your strategic internal R&D plan before starting your external Plan B?

Bio-Modeling Systems, a world leading R&D booster for life sciences discoveries, can help you save considerable time and resources immediately.

Very sincerely,

Manuel Gea,
Co-founder & CEO
BIO-MODELING SYSTEMS
